SLOVENIAN PLASTICS INDUSTRY

The above data are covering only a part of the whole plastic converting industry in Slovenia – only those that are primarily registered as NACE 22.2. There are many more plastic converters which are a part of other manufacturing companies (e.g. metal products manufacturing companies etc.).

Plastic products also provide solutions to many of today's environmental, health/hygienic, technical and other challenges, so it could be concluded that the whole plastic converting industry is very important for the economy of Slovenia.

SOLUTIONS.

ALPLA

ALPLA SLOVENIJA D.O.O.

SIZE: medium

OUR COMPANY

Alpla has been a leading producer of PET preforms for the Slovenian beverage industry since 2003. Using advanced technology and a skilled team, we maintain a strong market share. Committed to sustainability, we support circular economy projects, including producing 100% recycled PET bottles from Slovenian waste, processed in our Austrian recycling plant. This closed-loop system supplies 100% rPET preforms for Donat and Radenska. As part of ALPLA, a global leader in plastic packaging, we provide complete packaging solutions.

OUR PRODUCTS

- Plastic packaging and caps made from various materials.
